

MAKING WAVES

ISSUE 2Q 2021

NEWS HIGHLIGHTS:

TANKER REPAIRS GOING STRONG

During the second quarter of 2021, N-KOM successfully completed dry docking and general repairs for a number of oil tankers. The projects were delivered safely and on time to our clients Sun Enterprises, Evalend Shipping, Aza Shipping Private Limited and Woqod.

CELEBRATING 10 YEARS WITH MARAN GAS MARITIME

N-KOM is commemorating its 10th year partnership with esteemed client Maran Gas Maritime. Maran's LNG carrier 'Simaisma' was the first vessel to dock at N-KOM back in 2011. The vessel was recently at the shipyard for drydocking and a Ballast Water retrofit.

TANKER REPAIRS GOING STRONG

N-KOM continues to attract clients with its track record for quality and timely ship repair and maintenance services. During the second quarter of 2021, the shipyard safely completed and delivered over 45 marine and offshore projects to the satisfaction of its clients. The yard has seen a steady stream of enquiries and bookings for various types of vessel repair and maintenance projects this year, with the pandemic situation improving globally. N-KOM continues to strengthen its overall performance in safety, business execution, health, quality and manpower management to uphold service excellence and client satisfaction.

TANKER REPAIRS SUCCESSFULLY COMPLETED (2Q-2021)

MT Chios, an 81,000GT Crude Oil Tanker from Sun Enterprises completed dry docking and repairs at N-KOM.

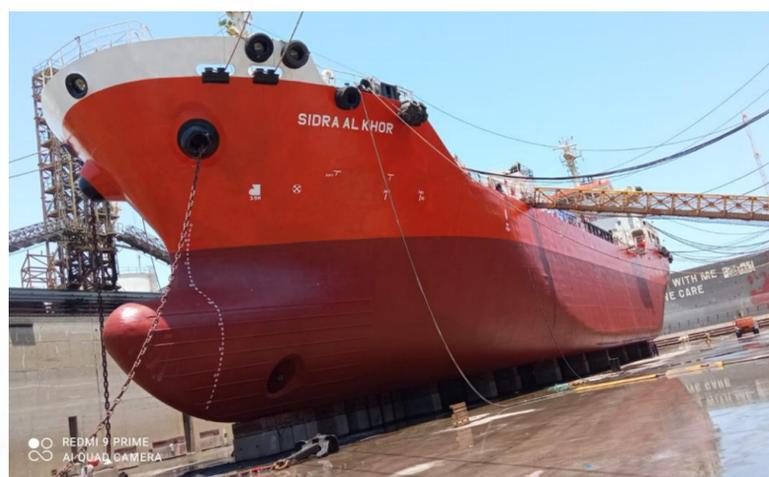

Drydocking, general repairs and pipe work completed on the 28,539GT Crude Oil Tanker, **Majnoon** for new client, Evalend Shipping.

Dry docking and repairs were carried out for the second vessel from Sun Enterprises in May 2021, the 81,315GT Crude Oil Tanker, **MT Christina**.

Drydocking, general repairs and steel renewal of the hull and deck area were completed for 78,845GT Crude Oil Tanker **MT Chafa** from repeat client, Aza Shipping Private Limited.

Drydocking and general repairs were executed for the 6,400 GT Chemical/Oil Products Tanker **Sidra Al Khor**, operated by repeat client Woqod.

SIMAISMA 2021

SIMAISMA 2011

CELEBRATING
50
YEARS
PARTNERSHIP WITH
MARAN GAS MARITIME

The first vessel to dock at N-KOM, the 142,971 cubic meters (cbm) LNG carrier, Simaisma had recently completed drydocking and a Ballast Water Treatment System (BWTS) installation at N-KOM in May 2021.

Between 2011 and 2021, Simaisma had periodically returned to N-KOM whenever the vessel was due for drydocking, maintenance and repairs. To date, more than 17 vessels from Maran Gas has been serviced at the shipyard since it first began operations in late 2010.

This is an excellent indication of the trust and confidence that Maran Gas, one of the world’s leading shipping companies, has in the quality of our services. On this occasion, the N-KOM management expresses its gratitude to our valued partner Maran Gas and hopes to continue the strong relations between both companies for many years to come.

OPERATIONAL HIGHLIGHTS FROM 2Q-2021

Given its strategic location in Qatar, N-KOM has built up a solid track record and reputation as a center of excellence for gas carrier repairs. The shipyard has completed a number of LNG drydocking and general repair projects during the past months, including ballast water system installations, commissioning and refit work for three LNG carriers from Maran Gas Maritime, MOL LNG (Japan) and Pronav Ship management GMBH.

With its proximity to oil and gas fields in the area, N-KOM has also amassed a strong clientele for offshore repairs over the years. The shipyard has completed more than 77 offshore repair and maintenance projects, as well as 12 offshore fabrication projects including the first offshore living quarters and largest topside to be fabricated in Qatar for key clients Qatar Petroleum and Qatar Gas back in 2020.

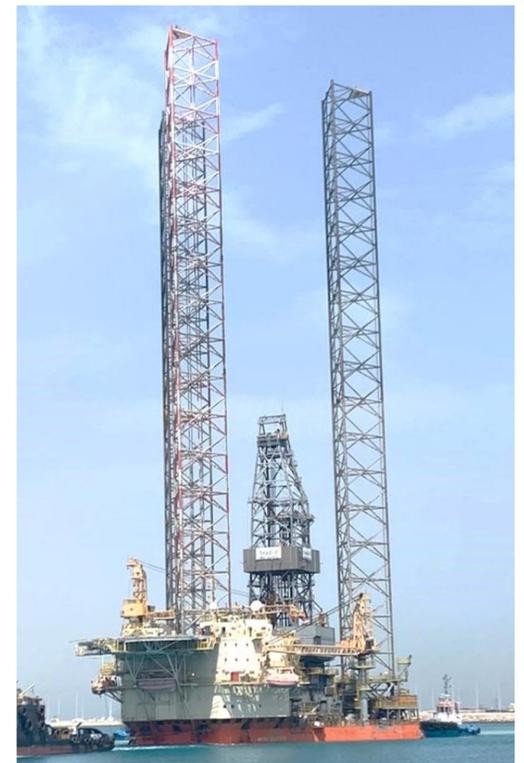

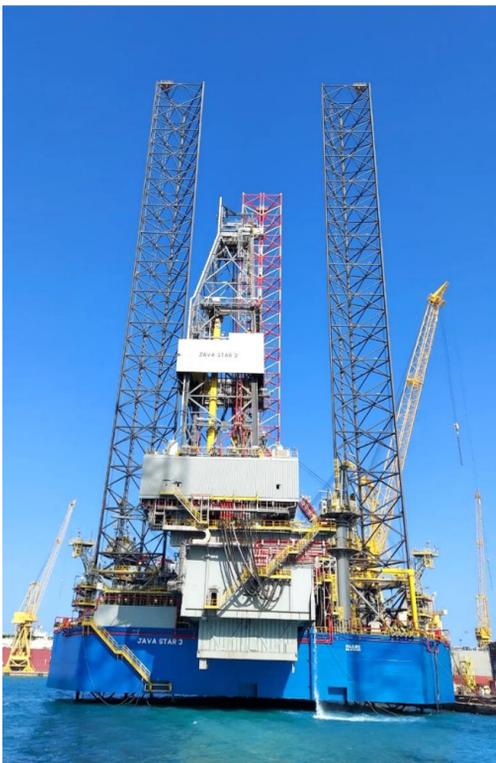

PROJECTS SHOWCASE

K Line (Japan)'s **LNG Zekreet** had repairs done to its turbine generator, boilers, cargo pumps as well as ballast tank steel renewal during the drydocking period earlier this year.

LNG Broog operated by NYK LNG Management (Japan) underwent drydocking, cargo tank and boiler repairs.

Several jack up rigs were serviced at N-KOM during the past few months for long-term client Gulf Drilling International (GDI). In addition to general repairs, the rigs **West Telesto** and **West Tucana** underwent spud can inspection and repairs, equipment mobilization as well as installation and renewal works.

More recently, the third jack up rig from GDI, **Java Star 3 Jack-up Drilling rig**, has sailed away from the shipyard to its operating site after completing major modifications to its high-pressure mud line, new platforms as well as installation of Moon Pool crane.

SAFETY, HEALTH & QUALITY UPDATES

IMS CERTIFICATION RENEWED

N-KOM successfully completed the IMS Certification Renewal Audit conducted by Lloyd's Register in June 2021.

The IMS Certification encompasses ISO 9001 Quality Management System, ISO 14001 Environmental Management System and ISO 45001 Occupational Health & Safety Management System.

CAT I – VIBRATION ANALYSIS CERTIFICATION

N-KOM's Asset Integrity team has been trained and awarded the CAT I - Vibration Analysis certification. This comes as part of a new maintenance strategy called 'Condition Monitoring', whereby vibration analysis plays a key role in monitoring, comparing and activating proactive maintenance prior to equipment failure. This applies to all rotating equipment such as pumps, motors and compressors.

Following the training completion, N-KOM's Asset Integrity team will ensure adequate planning and oversight of maintenance activities in the shipyard applying the concepts learnt to avoid equipment malfunction and keep our operations running smoothly.

MENTAL HEALTH FIRST AID CERTIFICATION

As part of building in-house capability to deal with mental health challenges in these uncertain times, several N-KOM staff have undergone and completed

the Mental Health First Aid Adult Course and been issued the Mental Health First Aider Certificates by Mental Health First Aid (MHFA) England.

The programme enables participants to learn how to assist someone who is developing a mental health issue or is in a mental health crisis such as depression, anxiety disorder, eating disorders, psychosis, having suicidal thoughts and behaviours, displaying self-harm or aggressive behaviours. The administration of Mental Health First Aid is most relevant in situations when it first becomes apparent to others that a person in their family or social or professional network is developing a mental health issue.

ENSURING BUSINESS CONTINUITY

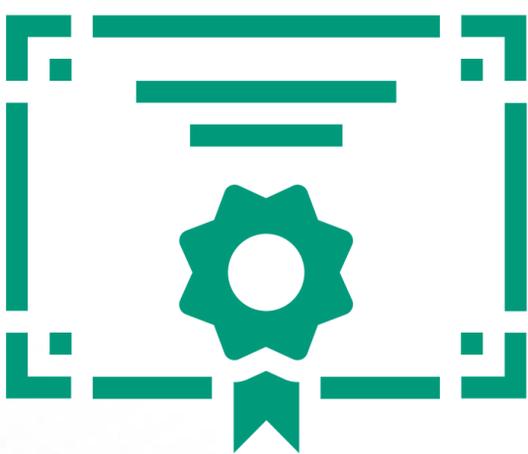

Through meticulous planning, N-KOM has managed to ensure workforce stability and business continuity at the shipyard throughout the COVID-19 pandemic. This has been achieved through a combination of control and containment measures.

The shipyard has achieved a high vaccination rate among its staff and sub-contractors, and conducts weekly mass testings, regular disinfection of facilities, regularly dissemination of health advisory and reinforces personal protection and precautions.

Thus far, N-KOM has maintained its operational momentum while ensuring compliance to Shipyard, local authorities and Government Health and Safety protocols.

LONG TERM SERVICE RECOGNITION AWARD

N-KOM recently honoured employees with Long Service awards for completing service milestones of ten years of service with the company. During the inaugural award held over a period of three days, N-KOM CEO Damir Glavan presented the awards to more than 250 N-KOM employees. The award is a symbol of N-KOM's appreciation towards its employees for their continued loyalty and dedication over the years.

N-KOM's top management expressed their gratitude and appreciation to its long serving staff for demonstrating outstanding commitment and dedication, who continue to immensely contribute to our company's success.
